## Our first Mueller Milk Tank installation has been completed.

Last year Westfalia Warragul was awarded the Mueller Milk Tank dealership for Australia. We are pleased to announce that our first Mueller Milk Tank installation was successfully completed during April by the team at Westfalia Warragul.

The tank was installed for MPH Farming, located at Labertouche. Mark & Trish had been making do with two older vats and twice a day pick up during their peak production periods, so recently the decision was made to purchase a new 15,000 litre vat. The new Mueller vat has enabled the Hammonds to immediately go to skip-a-day pick up at this time of the year.

Mark & Trish were fortunate to have an unused area under their existing dairy roofline, adjacent to the milking pit.

This was an ideal location for the new vat installation and allowed everything to be completed without any interruption to the normal milking routine.

Available power is limited at the MPH dairy, so the Mueller tank installation also included a new industrial plate cooler.

We wanted to ensure the best possible milk temperature reduction prior to the milk entering the new vat.

We thank Mark & Trish (and farm owners, the Interlandi family) for putting their faith in the experienced team at Westfalia Warragul.

Take care everyone!  
Best regards,  
Mark

## Safety Protocols on site - Reminder

Last month we circulated a letter to relevant customers seeking your permission for our employees to use your equipment to relocate delivered items on site, for example forklifts. Customers are requested to provide details of any equipment safety concerns and to ensure equipment is regularly serviced, so deliveries can be undertaken safely.

Our friendly delivery staff will carry copies of the letter and request for relevant customers to complete this at future deliveries. Feel free to contact a Store Manager if you have any questions.
